Belkin Corporation Selects Roving Networks to provide Bluetooth Access Point and Print Server Products for its new product line.

San Jose, CA -- March 17, 2003-- Roving Networks Inc., a provider of intelligent network appliances for wireless networks announced a design and licensing agreement for Bluetooth products with Belkin Corporation.

"By partnering with Roving Networks, we are now able to offer a product with three times the functionality of those existing on the market today and at one third the price." said Mike Chen, Director of Wireless Products at Belkin Corporation.

The Belkin Bluetooth Access Point with Print Server (F8T030) enables connectivity to Networks as well as Printers, and links wired LANs with Bluetooth-enabled devices such as PDAs and mobile phones. It is now available at major retailers and distributors at a street price of \$149.00. The product won the CES Innovations Award at the January 2003 Consumer Electronics Show in Las Vegas.

Roving Networks developed the F8T030 Access Point plus print server for Belkin, based on Roving Networks intelligent server appliance platform. This incorporates embedded Linux and ARM system-on-a-chip.

"We are delighted to be working with Belkin whose distribution channels are legendary" said Michael Conrad, CEO of Roving Networks. "With our unique integrated support for USB peripherals, such as printers, digital cameras, MP3 players, and other devices, Belkin Bluetooth Access Point is the ideal solution for simple and rapid deployment of Bluetooth Personal Area Networks in enterprises, SOHOs, homes and public areas."

About Roving Networks

Roving Networks is an Original Product Developer dedicated to supplying intelligent wireless devices at the lowest possible cost to OEM customers. The company has a proud heritage of building high quality, low cost network devices

for companies such as Compaq, Tektronix, Xerox, and Kodak. Roving Network's winning design philosophy has always been "more for less".
